

FORENSIVault - Digital Evidence Recovery Report

Court-Admissible Record of Cryptographically Verified File Recovery Operations

Case Identifier:	CASE-TEST-NTFS	Recovery Operation ID:	REC-20260913-211040
Execution Date / Time:	2026-09-13 21:10:40 UTC	Investigating Operator:	Senior Investigator Ruben
Evidence Source Target:	ntfs_evidence.img	Source Partition / Offset:	Sector Offset 0
Identified Filesystem:	NTFS	Evidence Integrity Mode:	READ-ONLY FORENSIC MODE (Software Read-Only Analysis Mode)

RECOVERY SESSION SUMMARY & STATISTICS

Total Candidates Found	1	Files Selected for Extraction	1
Successfully Recovered	1 file(s)	Unrecoverable / Corrupted	0 file(s)
Total Recovered Volume	105 bytes	Filesystem Metadata Recoveries	1
Raw Carved Recoveries	0	Fragmented File Candidates	0

Evidence Pre-Recovery SHA-256:	0a1e196a032f91f5e4e316c0df608dd65c2a93794b7f11006b263bd33a3ee5c3
Evidence Post-Recovery SHA-256:	0a1e196a032f91f5e4e316c0df608dd65c2a93794b7f11006b263bd33a3ee5c3
Forensic Analysis Mode:	100% BIT-FOR-BIT VERIFIED (EVIDENCE SOURCE UNMODIFIED)

RECOVERED FILES SUMMARY CATALOG

Comprehensive inventory of all evidence items processed during this recovery operation. No records have been truncated or omitted.

#	Filename	Type	Size	Method	Conf	SHA-256 Digest	Status
1	SUSPECT.JPG	JPG	105 bytes	NTFS Filesystem	95%	d3520cab...c45f6a06	Recovered

INDIVIDUAL RECOVERED FILE DOSSIERS & CONTENT EVIDENCE

Individual forensic metadata records and verified content representations for every recovered item. Original bitstream files are preserved in the recovery session repository.

Recovered File #1: SUSPECT.JPG

Original Filename:	SUSPECT.JPG	Recovered Filename:	SUSPECT.JPG
Original Path:	/SUSPECT . JPG	File Type / Ext:	JPG (.jpg)
File Size:	105 bytes	Filesystem Origin:	NTFS
Source Allocation:	Cluster: 0 MFT: #6 Offset: 0x58C0	Fragment Status:	Contiguous (1 Fragment)
Recovery Method:	NTFS Filesystem	Forensic Confidence:	95% (High)
Recovery Timestamp:	2026-09-13 21:10:40 UTC	Verification Status:	VERIFIED (Cryptographic SHA-256 match)
Cryptographic SHA-256:	d3520cab1fab736f1e7864e3fb2410379ddf4c59a7d86dbd0592bd4ac45f6a06	Isolated File Path:	D:\SIH\ForensiVault_Recovered\CASE-TEST-NTFS\REC-20260913-211040\SUSPECT . JPG

ACTUAL RECOVERED CONTENT | Recovered File: SUSPECT.JPG

FORENSIC INTEGRITY ATTESTATION & SIGN-OFF

Examiner Declaration: I hereby certify under penalty of perjury that the digital recovery operations documented herein were performed using ForensiVault in strict software read-only analysis mode. The recovered files have been cryptographically hashed and verified against the isolated evidence source. No data was altered, synthetically fabricated, or tampered with throughout the recovery lifecycle.

Primary Forensic Examiner:	Senior Investigator Ruben	Laboratory Agency:	ForensiVault Digital Forensics Laboratory
Examiner Signature:		Attestation Date:	2026-09-13 21:10:40 UTC
